

Enviro-Do-And-Show Projects

Switch/Outlet Cover

Materials Needed:

- scissors
- crayons
- white glue or tape
- construction paper
- switch template coloring sheet
- Help from mom, dad or your teacher

Step #1

Print out and color the project template/coloring sheets.

Step #2

Cut the center of the coloring sheet out of the page. This will allow the cover to be placed over and around the switch.

Step#3

Trace the cover to a piece of construction paper. Make sure to cut the center of this paper also. Glue the coloring sheet to the construction paper. This will make the cover stronger.

Step #4

Have mom, dad or your teacher place the switch cover over the light switch you want to be reminded to turn off. You can print out as many of these coloring sheets as you wish.

Saving energy by simply turning off the switch when you leave the room...it's that easy!
