

Rivers (Episode #102)

Strand: Aquatic

Name _____

Read "Rae Rae Wonders" and Answer the Questions

“Boy, I just love coming down to the Naturia River. It is always so nice to see fresh clean water flowing by. I just know that the fish that live in the river are very happy that the Naturia River is not polluted. However, not all fish are so lucky. The fish that live in rivers that are polluted really have hard time. And, the polluted river water eventually flows into the oceans where all my ocean friends live! I wish that all the people in the world could be like my Enviropal friends. Anyways, I just love coming here to the river in Naturia. I hope that the fish like living here as much as I do. I wonder if they know how lucky they are...I'm sure that they do.”

Rivers (Episode #102)

Strand: Aquatic
